**Mini mini moulder smaller than a
baking sheet**

**Easy to open and
easy to clean**

Can be used in 100 volts for home use

Recommended for bakeries

MASAKI

Easy to install and move

Uses a 100-volt household power supply that can be easily used. The installation space is 37 cm × 31 cm, and the weight is 40 kg, so it is a compact size that can be moved by one person.

Easy to clean and easy to repair

The compaction section and roll unit can be easily unfolded and disassembled, making it easy to clean the inside.

Only the parts that need to be repaired can be sent directly to the manufacturer by delivery, so you can use it anywhere in Japan.

The width of the feed opening (maximum approximately 200mm) and the flipping plate can be easily adjusted to fit the dough.

The width adjustment plate and flipping plate can be removed for cleaning.

"It comes with adjustable feet to prevent wobbling during use.

The conveyor belt uses an endless cotton belt without any metal components. A resin belt option is also available.

We can also provide emergency stop button switches and push-button switch options.

Gentle and hygienic on dough

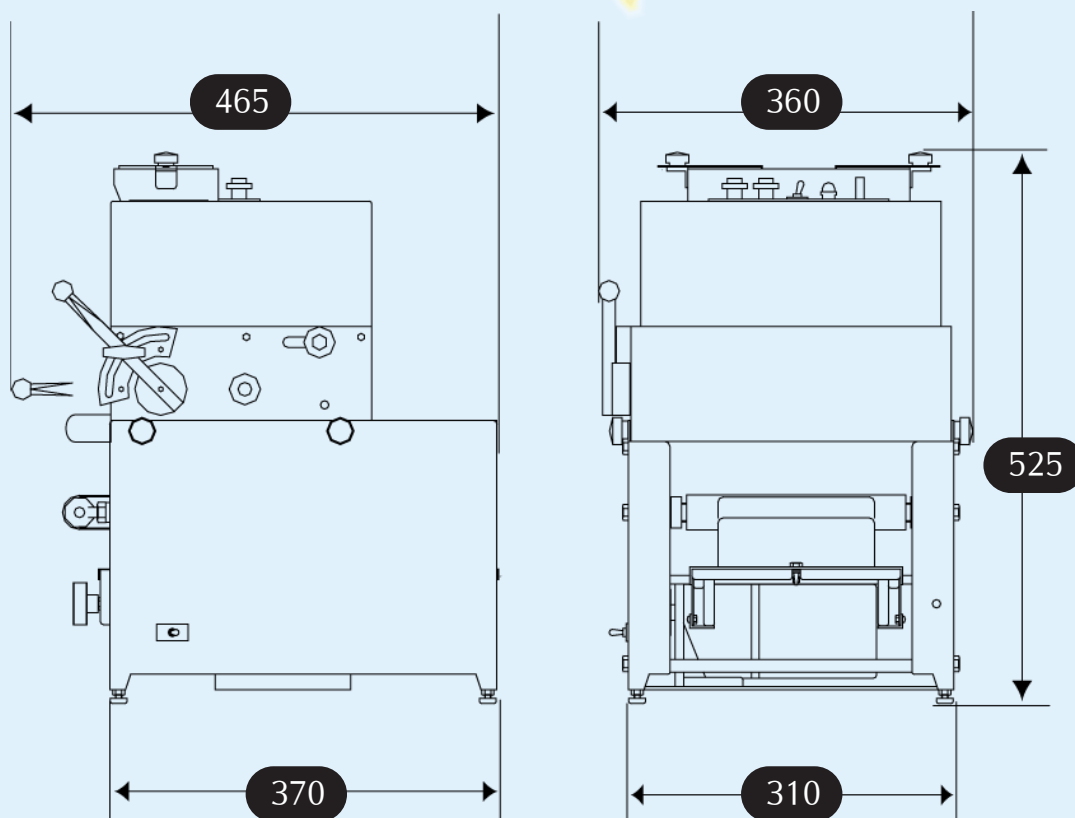

The hopper part is processed with fluororesin and is gentle on the fabric in combination with resin rolls.

The exterior is made of stainless steel and is hygienic.

Forming and stretching

In addition to shaping dock bread, bread, etc., it is also possible to flatten for wrapping such as ampang bread with the reverse rotation function of the conveyor.
